

Dataset 3: Global Survey Dataset - Objectives, Scope, and Sample Sizes (2020–2024)

ABSTRACT

This dataset provides an extensive overview of recent global surveys, spanning 2020 to 2024, with objectives ranging from healthcare practices and pandemic-related impacts to academic and professional perspectives. The collection consists of 209 studies, each detailing its primary research aim and the sample size used. Statistical analysis of the sample sizes reveals considerable variation, with a median sample size of 438, indicating that most surveys have a moderate reach. However, a significant standard deviation and skewness of 6.80 highlights that while most studies maintain smaller sample sizes, there are outliers with significantly larger participant counts. This distribution reflects the diversity in survey design, capturing focused and broad-based inquiries globally. The dataset provides a valuable resource for examining trends in sample size determination and survey scope across various fields, offering insights into methodological choices in international research contexts.

SAMPLE SIZE IN GLOBAL SURVEYS

Table D5-1: Recent Global Surveys, their Objectives and Sample Size (2020 – 2024)

Ref#	Ref	Objective	Sample Size
1	(Zanello et al., 2023)	To survey surgeons on optimal teaching and training approaches for Vagus nerve stimulation (VNS) therapy.	57
2	(Potere et al., 2024)	To evaluate VTE-related education, awareness, and unmet needs from the perspective of people living with cancer.	2262
3	(James et al., 2024)	To identify healthcare professionals' experiences and perceptions around transition readiness from paediatric to adult diabetes services.	372
4	(Hassanein, Ahmedani, et al., 2024)	To summarize fasting practices and complications in people with T2D who fasted during Ramadan, and the impact of pre-Ramadan diabetes education.	4889
5	(Hassanein et al., 2023)	To observe the impact of the COVID-19 pandemic on the intentions to fast and the outcomes of fasting in people with diabetes and CKD.	6736
6	(Hartz et al., 2022)	To understand the global impact of COVID-19 from the point of view of midwives' associations.	101
7	(Amal et al., 2024)	To carry out a global survey-based study on violence against healthcare workers and to describe survey strategies.	5500
8	(Endenburg & Van Lith, 2023)	To gain insight into veterinarians' opinions on their undergraduate education and access to continuing education.	1167
9	(Boldrini et al., 2023)	To investigate the utilization of Magnetic Resonance contrast agents (MRCA) in on-line MRIgRT.	43
10	(Zay Ya et al., 2024)	To assess antimicrobial stewardship and national implementation measures for antimicrobial use in LMICs.	352
11	(Harrigan et al., 2022)	To assess the protection of healthcare workers as COVID-19 emerged, associated with economic inequality among and within countries.	4977
12	(Martinino et al., 2023)	To investigate the characteristics of e-mail spam from predatory journals and conferences and analyze its impact.	978
13	(Santos et al., 2024)	To survey international rhinoplasty surgeons about dorsal preservation rhinoplasty techniques and practice patterns.	117
14	(Mizutani et al., 2024)	To explore the state of geriatric oncology practice worldwide and identify barriers and solutions.	21
15	(Abbas et al., 2024)	To assess global surgical practices in the management of hypospadias-associated penile curvature.	267
16	(Driessen et al., 2023)	To investigate knowledge, practice, and attitudes of healthcare workers towards NAFLD/NASH diagnosis and management.	613
17	(Hassanzai et al., 2023)	To explore current OPAT services globally, adherence to recommendations, and identify best practices and challenges.	126
18	(Prinz et al., 2024)	To collect information on activity-level evaluative reporting in forensic DNA analysis.	162
19	(Tan et al., 2023)	To investigate the psychological impact of COVID-19 among surgical providers.	4283

Ref#	Ref	Objective	Sample Size
20	(Calvo-Henriquez et al., 2023)	To assess current worldwide clinical practice regarding turbinate surgery in pediatric patients.	678
21	(Lam et al., 2023)	To identify gaps in knowledge around heart failure among the general public and policymakers.	26553
22	(Joseph et al., 2024)	To evaluate the long-term quality of life of cancer surgery survivors.	592
23	(Ogunyemi & Price, 2023)	To examine journalism educators' attitudes toward trauma literacy.	119
24	(Ha et al., 2023)	To assess the prevalence of rectal urgency in IBD patients and its association with disease activity and patient-reported outcomes.	2285
25	(Zhang et al., 2024)	To establish consensus for the coding of metabolic dysfunction-associated fatty liver disease in the ICD-11.	890
26	(Asadi-Pooya, Brigo, et al., 2022)	To investigate physicians' opinions on brain surgery for drug-resistant epilepsy.	1410
27	(Rao et al., 2023)	To explore the prevalence and types of traditional, complementary, and integrative medicine use among ethnic Indian women with PCOS.	3130
28	(Uribe et al., 2024)	To explore dental educators' perceptions of AI chatbots and large language models in dental education.	428
29	(Almuzian et al., 2023)	To assess technical factors and audience preferences for orthodontic online learning.	597
30	(Regueiro et al., 2023)	To assess the prevalence of fatigue and its association with disease activity in IBD patients.	2285
31	(Margot-Cattin et al., 2024)	To describe the provision of digital assistive technology by occupational therapists.	660
32	(Sijberden et al., 2023)	To assess attitudes toward the surgical management of synchronous colorectal liver metastases.	270
33	(Gopalan et al., 2023)	To assess the variability of management practices of post traumatic seizures (PTS) and post traumatic epilepsy (PTE) among neurologists and neurosurgeons.	220
34	(Leung et al., 2024)	To assess awareness of cognitive bias among forensic anthropology practitioners and students.	90
35	(Shushan et al., 2023)	To survey team-sport practitioners on current practices and perceptions of submaximal fitness tests (SMFTs).	66
36	(Zambelli et al., 2024)	To evaluate current practice among orthopedic surgeons regarding venous thromboembolism (VTE) prophylaxis following foot and ankle (FA) surgery.	693
37	(Shvero et al., 2023)	To assess variability in the diagnosis and treatment strategies in the endoscopic management of upper tract urothelial carcinoma (UTUC) and adherence to guidelines.	88
38	(Nardone et al., 2023)	To capture attitudes toward ulcerative colitis (UC) histology and the uptake of standardized reporting of endoscopy and histology in daily practice.	359
39	(Masár et al., 2022)	To evaluate the degree of project risk management application in companies globally.	1143
40	(Blasutig et al., 2023)	To evaluate the current status of global laboratory quality systems and assess the need for EQA programs for Clinical Chemistry and Laboratory Medicine.	41
41	(Ekhtiari et al., 2024)	To develop an international collaborative network to monitor emerging concerns in addiction medicine.	354
42	(Vazir et al., 2023)	To capture the therapeutic strategies used by physicians to treat acute decompensated heart failure (ADHF) and assess differences between cardiologists and non-cardiologists.	641
43	(Bonneau et al., 2024)	To determine the visual impacts and associated psychosocial burden of CHM in women.	55
44	(Zilberlicht et al., 2023)	To investigate doctors' opinions on the use of synthetic mesh for treating stress urinary incontinence.	593
45	(Saloustros et al., 2024)	To assess the attitudes and knowledge of LGBTQ health needs among healthcare providers.	672
46	(Rao et al., 2022)	To understand co-morbidities, key concerns, and quality of life among ethnic Indian women with PCOS.	4409
47	(Kauffman et al., 2023)	To identify the ways in which the global radiology community uses social media for radiology education.	254
48	(Landlust et al., 2023)	To collect lived experiences of parents of individuals with Phelan-McDermid syndrome.	587
49	(Naidoo et al., 2024)	To assess existing ultrasound practices and training in child surgery globally.	247
50	(Zelano et al., 2023)	To map guidelines and clinical practices for prescribing wearable seizure detection devices.	215
51	(Duncan et al., 2023)	To describe the structure and operations of emergency care clinical networks worldwide.	32
52	(Asadi-Pooya et al., 2023)	To investigate opinions of neurologists and psychiatrists on epilepsy and functional seizures.	1003
53	(Gocuk et al., 2024)	To investigate female carriers of X-linked inherited retinal diseases' experiences and knowledge regarding genetic testing and gene therapy.	228
54	(Hess et al., 2023)	To assess current practices for diagnosing and managing acute mesenteric ischemia worldwide.	587
55	(Zhou et al., 2024)	To investigate the development of business ethics teaching, research, and training in Mainland China from 2011 to 2023.	43
56	(Wong et al., 2023)	To examine global resilience levels and their association with maladaptive coping behaviors during the COVID-19 pandemic.	1762
57	(Banga et al., 2023)	To explore the nature, risk factors, impact, and measures for preventing violence against healthcare workers.	5405
58	(Feser & Krumphals, 2023)	To explore global naive conceptions about the viscous behavior of fluids among adults.	406
59	(Endler et al., 2022)	To investigate the inclusion of sexual and reproductive health and rights topics in medical curricula worldwide.	219
60	(Virk et al., 2023)	To assess pediatric dentists' knowledge, perceptions, training, and practices related to tobacco cessation interventions for adolescents.	235
61	(Al-Amad et al., 2023)	To explore factors influencing research interest and productivity in Oral Medicine and perceived barriers to conducting research.	593
62	(Van Wilgen et al., 2024)	To investigate whether medical doctors are familiar with ACR criteria for fibromyalgia and adhere to clinical guidelines.	286
63	(Coussement et al., 2024)	To survey clinicians worldwide on their practices and opinions about the initial empirical therapy of post-transplant pyelonephritis.	721
64	(Pyatlova et al., 2023)	To assess global management of mastocytosis by conducting a worldwide survey for physicians.	628
65	(Paudel et al., 2024)	To explore patient experiences seeking genomic services for inherited retinal degenerations.	410

Ref#	Ref	Objective	Sample Size
66	(Alqadi & O'Connell, 2024)	To assess the use, attitude, and confidence of pediatric dentists using clinical dental photography of children worldwide.	390
67	(Gamberini et al., 2023)	To explore antibiotic prescription and use practices in the antenatal care setting worldwide.	137
68	(Brock et al., 2023)	To survey international pulmonary physicians on gender diversity in interventional pulmonology.	92
69	(Dorfman et al., 2024)	To assess interpretation trends of High-resolution esophageal manometry with impedance data among gastroenterologists worldwide.	107
70	(Herout et al., 2023)	To evaluate the availability of technology for urolithiasis treatment and URS perioperative practices.	191
71	(Kristensen et al., 2022)	To compare HRQoL in patients with a permanent colostomy after rectal cancer across different countries.	2557
72	(Shah et al., 2024)	To explore global practices in NOA diagnosis.	367
73	(Hashemi et al., 2023)	To assess the health effects of sanitizers and disinfectants globally.	91056
74	(Karagöz et al., 2022)	To explore attitudes and practices regarding the prevention of urinary stone disease recurrence.	305
75	(Hassanein, Binte Zainudin, et al., 2024)	To describe care patterns for T2DM during Ramadan 2020 and 2022.	12529
76	(Deora et al., 2024)	To examine the perceptions of neurosurgeons towards the pandemic and its impact on their practice.	1000
77	(Rambhatla et al., 2024)	To evaluate contemporary global practices related to medical and surgical management for patients with NOA.	336
78	(Campus et al., 2024)	To study factors influencing career choices among female dentists globally.	3232
79	(Adhiyaman et al., 2023)	To explore global prescribing practices and governance.	139
80	(Barrenetxea-Garcia et al., 2024)	To assess the use and limitations of recovery strategies among water polo players and coaches.	307
81	(Hejrati et al., 2024)	To examine international practices and knowledge regarding acute SCI management.	593
82	(Glynos et al., 2024)	To investigate if psychedelic use is associated with changes in the use of other substances.	5268
83	(Kovi et al., 2023)	To report the impact of the COVID-19 pandemic on mobile stroke units globally.	20
84	(Wijewickrama et al., 2022)	Ascertain the availability, readiness, and prioritization of COVID-19 vaccines for patients with advanced CKD or kidney failure receiving replacement therapy globally.	99
85	(Wheeler et al., 2023)	Understand the global state of internal quality control (IQC) practices in clinical laboratories and their management.	46
86	(Koutsouras et al., 2023)	Characterize the demographic features and workplace inequities faced by the global women neurosurgery community.	237
87	(Singh et al., 2024)	Understand current practices for treating acute ischemic stroke with large vessel occlusion worldwide.	203
88	(Plummer et al., 2021)	Assess the suitability of health-related interventions for inclusion in school health services to inform WHO guidelines.	1293
89	(Rao et al., 2021)	Survey disruptions to small and sick newborn care worldwide due to COVID-19 and analyze healthcare providers' experiences.	1120
90	(Hickman et al., 2021)	Investigate climate anxiety in children and young people globally and its relationship with perceived government response.	10000
91	(Ineichen et al., 2021)	Assess the frequency of dental trauma in professional alpine skiing and its association with performance level and experience.	161
92	(Noushad et al., 2022)	Inform policymakers on factors affecting COVID-19 vaccine acceptance among healthcare workers in 12 countries, based on income index.	2953
93	(Fabi et al., 2022)	Survey facial aesthetic concerns, desires, and treatment goals of aesthetically conscious individuals and physicians across 18 countries.	14584
94	(Parry et al., 2021)	Explore if training in applied epidemiology meets current needs of the workforce, especially highlighted by COVID-19.	282
95	(Yiasemidou et al., 2021)	Assess the impact of COVID-19 on surgical training globally and develop a recovery framework.	608
96	(Asadi-Pooya, Trinkka, et al., 2022)	Investigate neurologists' opinions and attitudes toward counseling about sudden unexpected death in epilepsy (SUDEP) worldwide.	1123
97	(Lechien et al., 2021)	Study the management of laryngopharyngeal reflux (LPR) among otolaryngology-head and neck surgeons and their trainees.	824
98	(Lim et al., 2022)	Assess the efficacy of webinars on percutaneous nephrolithotomy (PCNL) for professional training and clinical practice transformation.	303
99	(Bhargava et al., 2021)	Evaluate dermatologists' responses to virtual conferences and e-learning programs during the pandemic.	733
100	(Dos Santos et al., 2021)	Investigate healthcare professionals' perceptions on decision-making regarding insulin pumps and continuous glucose monitoring in pediatric type 1 diabetes.	247
101	(Klawitter et al., 2022)	Evaluate current practices for diagnosing, treating, and preventing intensive care unit-acquired weakness (ICU-AW) in critically ill patients.	154
102	(Wong et al., 2021)	Assess global COVID-19 vaccination intentions and factors influencing vaccine acceptance.	19714
103	(Dev et al., 2022)	Examine the association of sex and gender-related factors with adherence to COVID-19 protective health behaviors.	48668
104	(Parmar et al., 2021)	Analyze perceptions and details of bariatric medical tourism (BMT) among healthcare professionals globally.	383
105	(Fuggle et al., 2021)	Investigate the impact of COVID-19 on osteoporosis management, including telemedicine consultations and medication delivery.	209
106	(Dewey et al., 2022)	Capture clinical use of MRI in patients with cochlear implants and characterize patient progression from referral to imaging.	237
107	(Horst et al., 2021)	Investigate dementia literacy and its demographic influences to inform public health initiatives.	598

Ref#	Ref	Objective	Sample Size
108	(Aristovnik et al., 2021)	Capture higher education students' perceptions of the COVID-19 pandemic's impact on their lives and studies.	31212
109	(Tomeczyk et al., 2021)	Assess the impact of COVID-19 on antimicrobial resistance (AMR) surveillance and practices among WHO GLASS countries.	73
110	(Dubinsky et al., 2021)	Identify the impact of ulcerative colitis (UC) and compare patient and physician perceptions on its burden and management.	3354
111	(Craig et al., 2021)	Describe senior emergency physicians' confidence and performance in critical nonairway procedures among pediatric patients.	1503
112	(Ellakany et al., 2022)	Examine differences in sleep patterns, sexual activity, screen use, and food intake between students and non-students during the COVID-19 pandemic.	17008
113	(Niyongere et al., 2022)	Identify barriers to generic substitution of antiseizure medications among healthcare professionals.	800
114	(Blažić et al., 2021)	Collect information on radiology departments' practices in managing COVID-19 patients globally.	50
115	(Romdhani et al., 2022)	Assess the effects of COVID-19 lockdown on athletes' circadian rhythms, sleep, eating, and training behaviors.	3911
116	(Rubin et al., 2021)	Investigate patient and physician perspectives on living with ulcerative colitis and identify gaps in care.	3354
117	(Hassanein et al., 2021)	Describe characteristics and care of type 2 diabetes patients during Ramadan fasting amid COVID-19.	5865
118	(Bauer et al., 2022)	Evaluate the impact of COVID-19 on clinical research strategies and adaptations by regulatory bodies and academic institutions globally.	19
119	(Sharma et al., 2021)	Examine knowledge, attitudes, and practices related to gender-based violence (GBV) risk mitigation during COVID-19 among humanitarian practitioners.	170
120	(Hansen et al., 2021)	Assess transplant surgeons' knowledge and attitudes regarding kidney transplantation guidelines for women with breast cancer.	129
121	(Misery et al., 2021)	Investigate associated factors impacting sensitive skin among a global population.	10743
122	(Cufer et al., 2021)	Survey the recognition of medical oncology as a specialty and the adoption of a global curriculum for medical oncology training.	62
123	(Thite et al., 2021)	Understand the views of contact lens practitioners regarding opportunities and threats in their practice globally.	2408
124	(Triki et al., 2022)	Assess the impact of COVID-19 on neurology services worldwide, focusing on service disruptions and mitigation strategies.	54
125	(Stewart et al., 2022)	Identify demand-side factors influencing the uptake of Advanced Trauma Life Support (ATLS) courses globally.	30
126	(Marzo, Shrestha, et al., 2022)	Explore perceptions of vaccine effectiveness among rural and urban communities during COVID-19.	5673
127	(Kaliki et al., 2022)	Evaluate variations in defining high-risk histopathologic features for retinoblastoma metastasis across different practices.	27
128	(Hall et al., 2022)	Assess disruption to hip fracture services during the COVID-19 pandemic.	185
129	(Schillebeeckx et al., 2022)	Determine the current practices and perceptions of clinicians regarding adjunctive therapies after botulinum toxin injections for limb spasticity.	527
130	(Ponsford et al., 2021)	Examine international practices in assessing and treating patients recovering from traumatic brain injury.	400
131	(Younossi et al., 2022)	Assess knowledge of nonalcoholic fatty liver disease (NAFLD) among physicians globally and associated factors.	2202
132	(Gyenes et al., 2021)	Examine how geriatricians diagnose and manage unintentional weight loss among older adults.	1131
133	(Endler et al., 2021)	Overview trends in access to sexual and reproductive health rights during the COVID-19 pandemic.	51
134	(Rubilotta et al., 2022)	Analyze trends in erectile rehabilitation following radical prostatectomy among urologists and other specialists.	518
135	(Cabral et al., 2022)	Assess opinions of cystic fibrosis researchers on the potential for successful treatments in the next 15 years.	524
136	(Sharma et al., 2022)	Determine adherence to enhanced recovery after surgery protocols among global urologists for radical cystectomy patients.	443
137	(Qamar et al., 2022)	Evaluate dentists' awareness and attitudes towards photodynamic therapy during and before the COVID-19 pandemic across several countries.	1219
138	(Pernigoni et al., 2022)	Assess perceived usefulness and barriers to implementing recovery strategies among basketball practitioners.	107
139	(Abduljabbar et al., 2021)	Evaluate the prevalence of burnout among spine surgeons and its association with quality of life.	818
140	(Gray & Jourdan, 2022)	Explore global practices and guidance regarding school reopening during the COVID-19 pandemic.	192
141	(Phadraig et al., 2021)	Report the impact of COVID-19 lockdown on oral healthcare provision for people with disabilities.	436
142	(Gibbard et al., 2021)	Characterize global patient and caregiver experiences during developmental dysplasia of the hip (DDH) care.	739
143	(Folayan et al., 2022)	Assess the association between emotional distress and oral health during the COVID-19 pandemic.	14970
144	(Lele et al., 2022)	Explore the impact of COVID-19 on neurocritical care delivery and identify challenges in service provision.	253
145	(Radfar et al., 2021)	Assess how COVID-19 has affected substance use disorder treatment and harm reduction services globally.	177
146	(Kanumilli et al., 2021)	Explore treatment inertia in early cardiorenal risk management for type 2 diabetes among healthcare providers.	1677
147	(Gomez et al., 2022)	Investigate the impact of the COVID-19 pandemic on interventional radiology services and working patterns.	450

Ref#	Ref	Objective	Sample Size
148	(Asefa et al., 2022)	Examine how the COVID-19 pandemic affected respectful maternity care from the perspective of frontline health workers globally.	1127
149	(Gruenbaum et al., 2021)	Understand global perceptions and practices related to glycemia management in patients undergoing craniotomy for brain tumor resection.	435
150	(Farhoudian et al., 2021)	Understand changes in substance use patterns during the COVID-19 pandemic among individuals with substance use disorders (SUDs).	185
151	(Burns et al., 2022)	Assess the experiences of mental health professionals regarding training in intimate partner violence (IPV) and factors influencing their likelihood of receiving training.	321
152	(Field et al., 2021)	Survey soccer practitioners about their recovery strategies, perceived effectiveness, and factors influencing implementation in professional soccer.	80
153	(Williams et al., 2021)	Understand the experiences of women with lung conditions during pregnancy and the postpartum period.	327
154	(Tallach et al., 2022)	Identify challenges faced by clinicians during terrorist mass casualty incidents and areas for improvement in future responses.	33
155	(Kadirvelu et al., 2022)	Examine variations in COVID-19 symptom profiles based on underlying chronic disease and geographical location.	78299
156	(Salgaonkar et al., 2022)	Investigate the evolving role of insurance medical directors and their contributions during the COVID-19 pandemic through a global survey.	124
157	(Marzo, Ahmad, et al., 2022)	Determine factors influencing perceptions of COVID-19 vaccine efficacy, acceptability, and hesitancy in various populations.	10477
158	(Tawiah et al., 2021)	Investigate the extent and barriers of advanced practice in physiotherapy globally.	82
159	(Duc et al., 2021)	Assess PTSD status and contributing factors in quarantined individuals during the COVID-19 pandemic using the Impact of Event Scale-Revised (IES-R).	944
160	(Perrotta et al., 2021)	Investigate side effects of COVID-19 vaccines among healthcare professionals and armed forces personnel through an international survey.	375
161	(Asadi-Pooya et al., 2021)	Investigate opinions of physicians on the use of complementary and alternative medicine (CAM) in patients with epilepsy worldwide.	1112
162	(Dikmen et al., 2021)	Assess global differences in approaches to multimodal intraoperative neuromonitoring (IONM) practices.	205
163	(Gabrielson et al., 2022)	Characterize ergonomic practices and rates of musculoskeletal pain among urologists performing retrograde intrarenal surgery (RIRS).	519
164	(Viana et al., 2021)	Validate the psychometric properties of the ITP Life Quality Index (ILQI) using data from the ITP World Impact Survey (I-WISH).	1507
165	(Airlie et al., 2021)	Understand current methodologies, biases, and opinions in forensic hair analysis through a global survey of hair analysts.	176
166	(Vallasciani et al., 2021)	Collect baseline information on ultrasonographic reporting preferences among pediatric urologists and surgeons.	380
167	(Anaki & Sergay, 2021)	Identify predictors of health behavior related to COVID-19 in a global survey conducted during the early days of the pandemic.	953
168	(Walker et al., 2020)	Investigate healthcare professionals' indications and methods for examining the neck in patients with shoulder pain.	918
169	(Chowdhury et al., 2021)	Gather information on the management of acute ischemic stroke patients undergoing endovascular thrombectomy during the COVID-19 pandemic.	114
170	(Lazarus et al., 2020)	Develop a tool to assess public perceptions of government responses to COVID-19 and examine its validity across demographics.	13426
171	(Tomson et al., 2020)	Assess the use of guidelines for managing women with epilepsy during pregnancy among ILAE Chapters.	77
172	(Champagne et al., 2020)	Understand global practices related to endoscopic endonasal surgery during the COVID-19 pandemic.	135
173	(Louie et al., 2020)	Collect perspectives on pharmacologic thromboprophylaxis in spine surgery through an international survey of spine surgeons.	316
174	(Tartari et al., 2020)	Explore views and behaviors of healthcare workers regarding presenteeism when experiencing influenza-like illness.	533
175	(Fontanella et al., 2020)	Investigated the situation of neurosurgeons during the COVID-19 pandemic.	446
176	(Siriwardena et al., 2020)	Examined management of patients supported with VA-ECMO.	243
177	(Clynes et al., 2020)	Assessed quality and accessibility of DXA services worldwide.	121
178	(Lazaridis et al., 2020)	Evaluated the impact of COVID-19 on bariatric surgical practice.	169
179	(Loh, Horvath, Wang, Koch, Adeli, et al., 2020)	Investigated operational challenges in biochemistry laboratories during COVID-19.	1210
180	(Chudasama et al., 2020)	Assessed the global impact of COVID-19 on routine care for chronic diseases.	202
181	(Mehta et al., 2020)	Examined practice changes among rheumatologists during the COVID-19 pandemic.	548
182	(Dudi-Venkata et al., 2020)	Gauged surgeons' preferences and practices regarding laxative use after elective colorectal surgery.	852
183	(Lázaro-Muñoz et al., 2021)	Examined practices and perspectives on returning genetic research results among psychiatric genetics researchers.	407
184	(McKinley et al., 2020)	Investigated global variation in ecosystem services and management practices of saltmarshes.	438

STATISTICAL SUMMARY OF SAMPLE SIZE

The statistical distribution of sample sizes across more than 200 global surveys analysed in this study reflects significant variability, as the descriptive statistics indicate. The first quartile (Q1) of the sample size is 185, suggesting that 25% of the studies sampled fewer than 185 participants. The median (Q2) of the sample sizes is 438, indicating that half of the global surveys involved fewer than 438 participants, which aligns closely with typical sample sizes for specialised academic surveys. The third quartile (Q3) reaches 1,143, showing that 75% of the studies had sample sizes below this figure, illustrating a wide range but generally moderate scale in global survey research.

The notably high standard deviation of 9,634.39 points to a substantial spread in the data, reflecting the diverse methodologies and scopes of studies ranging from niche topics with small target populations to extensive surveys capturing broad demographic data across numerous countries. The skewness of 6.80 further emphasises the positive skew in the data, indicating that while most surveys maintain smaller sample sizes, there are exceptional cases with significantly larger samples extending far beyond the typical range, distorting the average upwards. These statistics underscore the context-specific nature of sample size determination in global surveys, affirming that our selected sample size is well-justified and robust for analytical purposes within the scope of our research objectives.
